Project #4

Lighting

[Kaltura Capture recording - November 1st 2021, 11:51:28 pm - OSU MediaSpace \(oregonstate.edu\)](#)

2 stationary lights and 2 moving lights.

2 white(point), 1 purple and 1 yellow are spotlight

2 stationary object and 3 moving objects

2 shiny and 3 dull (spheres)

1 flat (torus) and 1 smooth (teapot)

Small spheres for showing where the lightbulbs are.

Although I tried some thoughts and places to put the code, I couldn't put the bmp file on the moving sphere, and even I putted on a sphere, it couldn't be lighted.

So, that's all. Thank you.
